## Liquid Interface Film Technology

LIFT tehnologija ohranja na površini banjice plast nepolimeriziranega materiala, kar zmanjša sile odstranjevanja s površine. To omogoči manjšerazdalje med plastmi, hitrejši čas tiskanja in podaljša uporabnost banjice.

## Retrax

Retrax je komplet retraktorjev za lica, narejen iz visoko zmogljivega polimera, ki združuje mehansko vzdržljivost z optičnimi lastnostmi, kot sta visoka ekstinkcija in nizka površinska refleksija. Zaradi tega je Retrax idealen pripomoček za standardizirano zobozdravstveno fotografijo.

Retrax lahko sterilizirate s programom hitrega cikla pri sterilizacijski temperaturi 134°C in času sterilizacije 03:30 minut.
