Euronda®

It's all about protection

Founded in 1975, Euronda is now an Italian company with a global outlook, synonymous with outstanding protection in the medical field. With more than 200 employees, a 15,000 sq.m. headquarters, four subsidiaries abroad and affiliates worldwide, it is present on the market with four product lines dedicated to the safety of the dental environment and the protection of professionals, dentists and patients.

Monoart®, the range of disposable products that teams maximum quality with vibrant colours. **Pro System**, the comprehensive sterilization system that optimises and tracks the entire process. **Alle®**, the disposable line to create a sterile surgical field and prevent infection. **Eurosteril®**, rolls and pouches that ensure sterility is maintained over time.

Driven by a dynamic team, Euronda combines in-depth knowledge of the market with ongoing innovation in materials, processes and technologies to meet the needs of the sector and optimize work phases in full compliance with regulations, with particular attention to the environmental impact of the products and processes.

Euronda for the environment

Because Earth is forever

Here at Euronda we produce disposable materials, and we do it right, with all the quality you'd expect from Italy. Great care goes into every product, from the choice of the raw materials to the production process and the packaging.

We believe in the circular economy, recycling and sustainability: this is why Euronda has been committed for some time now to reducing our environmental impact, redefining production processes to optimise the consumption of energy, water, paper and waste.

It is important, however, to remember that many disposable products used in dentistry are considered potentially infectious. This means they cannot be treated as normal urban waste, and must be given to specialist firms for disposal in dedicated incinerators.

Choosing Euronda means sharing our production philosophy, focused on attention to processes, recycling and recovering waste, with respect for people and the environment.

How do we make sure production remains sustainable?

Today, the challenge faced by Euronda is twofold: on the one hand, to ensure total quality, safety and efficacy of our range, and on the other, to work in a way that respects the planet by focusing our efforts on several fronts:

Green production

We are the world's top manufacturer of saliva ejectors, and our production lines are equipped with a system that allows for the recirculation and recycling of 100% of the water used.

100% clean energy

We use energy from renewable sources for the entire needs of our premises.

Self-generated energy

Our photovoltaic system produces around 198,000 KWh/year, which is equivalent to the annual consumption of 73 households, preventing 105 tonnes of CO₂ emissions from entering the atmosphere each year.

Paper

All our products, secondary packaging and over 80% of our primary packaging use paper from supply chains that are committed to sustainable forest management, with a focus on the economic, environmental and social aspects.

Plastic

For some time now, we have been using plastics free from toxic or mutagenic phthalates, in compliance with the 2006 European REACH Regulation. Where possible, we opt for recyclable plastic films for our packaging.

Glue-free

Thanks to the use of paper/polyethylene mechanical bonding technologies, we save 3700 kg of synthetic glue per year in the production of our Towel Up! towels and 4750 kg in the production of our PG30 aprons.

Coloured

With the Kit Monoart® 100%, available in ten vibrant colours, you can coordinate with your clinic or brighten it up with your favourite colour.

Smart

It helps you manage your work effectively: organize your practice by colour, distinguish by procedure type, dentist or dental unit.

Compact

Tailored to the dental practice, the Kit Monoart® 100% offers everything needed for 100 patients, guaranteeing maximum protection and quality.

Kit Monoart® 100%

Ten colours, 100 items and 100% original.
All the essence of Monoart® and the original appeal of a unique range. All the safety and protection professionals and patients deserve. All the quality of a 100% Italian product, with the attention to detail typical of the Euronda brand.

1 kit contains:

- 100 Towel Up! towels;
- 100 tissues;
- 100 saliva ejectors;
- 100 plastic cups;
- 100 face masks Protection 3;
- 80 PG30 aprons.

Colours

Blue, blue lagoon, green, light blue, lilac, lime, orange, pink, white, yellow

Size

Box 40 x 25 x 19 cm (lxdxh)

Weight

3,2 kg

Packaging

1 box containing 1 kit

Towel Up!

Monoart® Towel Up! disposable towels are made in Italy from highly absorbent multiple-ply pure cellulose fibre wadding, embossed with a waterproof polyethylene film, without the use of glues. Their unique, 100% recyclable packaging features an 'open/close' system that protects the contents from dust and contamination, guaranteeing maximum hygiene from the first to the last towel. The opening is designed to combine practicality and protection: it allows only one towel to be removed at a time, avoiding contact with the next one.

Available accessories

- Practical white dispenser for disposable towels (dimensions: 16.5 x 16.5 x 12.5 cm);
- Adjustable towel chain in brass and chrome-plated steel (length approx. 45 cm).

Colours

Black, blue, blue lagoon, burgundy, grey, light blue, light green, lilac, lime, natura, orange, pink, white, yellow

Size

Pack 17 x 8 x 11 cm (lxdxh)
Towel 33 x 45 cm

Packaging

Pack of 50 towels with 'open/close' system
Carton of 10 packs
(500 towels in total)

Practical

Keep your clinic tidy and simplify your work with innovative packaging and compact design, available in all Monoart® colour variants.

Safe

Made without the use of glues, with pure cellulose from a sustainable supply chain and non-toxic polyethylene.

Hygienic

Automated production lines and protective packaging: from the time they leave production until the time they're used, they maintain maximum hygiene and cleanliness to minimise the risk of contamination.

PG30 aprons

Disposable patient protection aprons on a roll consisting of a highly absorbent paper, multiple-ply and embossed with a waterproof polyethylene layer, without the use of glues. Soft and comfortable, compared to traditional towels, they offer larger dimensions and a different contouring on the neck and shoulders for complete patient protection. The printed dashed areas simplify placement for the operator. Product made in Italy.

Product mix available

- Mix Monoart® PG30 aprons: 6 rolls of PG30 aprons in 6 different colours (blue, lilac, lime, orange, pink, yellow).

Available accessories

- Practical dispenser container for roll aprons (dimensions: 34.3 x 13.2 x 14.2 cm).

Colours

Blue, blue lagoon, burgundy, light blue, light green, lilac, lime, natura, orange, pink, white, yellow

Size

Roll of 80 aprons:
apron 61 x 53 cm (lxd)
Roll of 60 aprons:
apron 81 x 53 cm (lxd)

Packaging

Pack of 6 rolls

Protective

Thanks to their special contouring, they cover and protect the patient entirely, including the shoulders, remaining snug and well extended once secured around the neck.

Practical

The tie system allows the apron to be tied directly around the patient's neck. The perforated tear-off parts make the aprons easy to use.

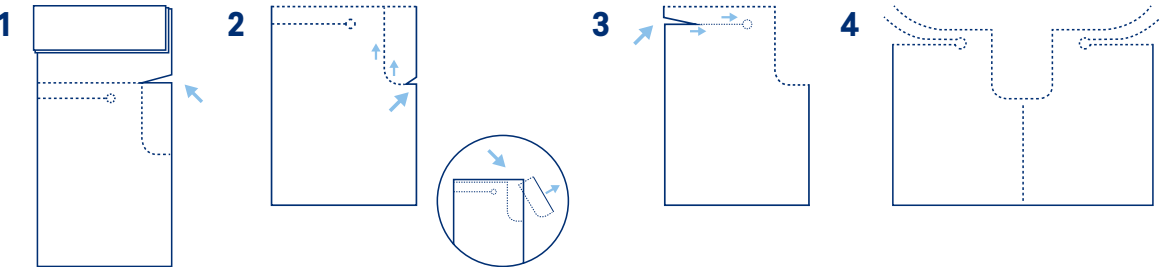

Absorbent

The embossing technique and mechanically manufactured without glue guarantees excellent adhesion results and also improves the absorbency speed of the apron.

PG30 and PG20 aprons

Instructions for use

PG20 aprons

Patient protection aprons in roll form made of a waterproof polyethylene film. The perforated tear-off parts make the aprons easy to use. Product made in Italy.

Colours

Blue, green, white

Size

Roll of 200 aprons:
apron 81 x 53 cm (lxd)

Packaging

Pack of 6 rolls

Waterproof

Made of polyethylene film, they ensure maximum impermeability and patient protection.

Protective

Thanks to its special contouring, once opened out on the patient, the apron perfectly protects the whole person, including the shoulders, and remains stretched out when tied around the neck.

Practical

The tie system allows the apron to be tied directly around the patient's neck. The perforated tear-off parts make the aprons easy to use.

Baby towels

Roll of towels made from highly absorbent pure multiple-ply cellulose fibre wadding, embossed with waterproof polyethylene film. Their small size makes them suitable for smaller patients.

Available accessories

- Adjustable towel chain in brass and chrome-plated steel (length approx. 45 cm).

Colours

Light blue, pink

Size

Roll of 100 towels:
towel 35 x 40 cm

Packaging

Pack of 24 rolls

Functional

Towels made from highly absorbent pure multiple-ply cellulose fibre wadding, embossed with waterproof polyethylene film.

Practical

Thanks to its compact size, the roll is a convenient alternative to classic folded towels.

Suitable for small children

Available in two vibrant colours, they provide perfect protection for younger patients thanks to the reduced size.

Tissues

Soft and durable, they are made from 100% pure double-ply cellulose (total grammage 31 g/m²) from FSC-certified forests managed according to strict environmental, social and economic standards. Product made in Italy.

Colour

White

Size

Pack 23 x 12 x 5 cm (lxdxh)

Towel 20 x 21 cm

Packaging

Single pack (100 tissues)

Box of 40 packs

Practical

Thanks to the practical packaging, the tissues are always at hand and easy to take out of the box.

Resistant

Made of pure, double-ply cellulose fibre wadding for excellent strength and absorbency.

Delicate

Monoart® tissues are soft and have a pleasant feel on the skin.

Saliva ejectors

Flexible disposable saliva ejectors made of non-toxic transparent PVC, equipped with a built-in wire that allows perfect retention of the set angle, with no risk of leakage when bent. The rounded fixed or removable cap is also ideal for patients with sensitive or irritated mucous membranes. The saliva ejectors are entirely manufactured in Italy according to strict quality and safety standards, using hands-free production lines and automated control systems that minimize handling.

Product mix available

- Mix Monoart® saliva ejector: 12 bags of saliva ejectors (100 pieces each) in 6 colours (blue, lilac, lime, orange, pink, yellow), 2 bags per colour.

Available accessories

- Saliva ejector adaptor autoclavable to 134°C. Can be used to adapt from a connection with a diameter of 1.6 cm to an outlet with a diameter of 6.5 mm.

Classification

Medical Device Class IIa

Colours

Blue, blue lagoon, burgundy, green, lilac, lime, orange, pink, transparent, yellow

Size

6.5 mm x 12,5 cm (Øxl)
6.5 mm x 15 cm (Øxl)

With fixed or removable cap

Packaging

Bag of 100 pieces
Box of 50 bags
(total 5000 pieces)

CE Ref

Monoart® Aspirasaliva
EM15, EM15 Saliva Ejector,
EM15 Speichelsauger

Eco-friendly

The production lines of the saliva ejectors are equipped with a system that recirculates the water used in production, avoiding waste. Even the packaging is eco-friendly: the plastic bag is recyclable and the box is made of paper from certified supply chains.

Safe

Produced in non-toxic, phthalate-free PVC through a fully automated process. Each part is subjected to numerous checks to minimize the defect rate and increase the quality standard of the product.

For every need

Available in two different lengths to meet the needs of each clinic. Equipped with fixed or removable rounded tips that won't irritate mucous membranes.

Eco-friendly

Monoart® aspirator tips are autoclavable up to 100 times at 134°C.

Comfortable

EM19 and EM21 tips have a reduced contact surface, with 'winged' tips that are smaller and less curved to improve patient comfort.

Effective

The internal bevel of the EM19 and EM21 tips facilitates the outflow of fluids, while the bending angle ensures a more discreet and quieter suction.

Aspirator tips

Monoart® aspirator tips are manufactured in Italy and are available in three different sizes and models:

- EM19 tips: length 11.4 cm;
- EM21 tips: length 12.9 cm;
- EM40 tips: length 20 cm.

The EM19 and EM21 tips are also equipped with an ergonomic non-slip grip that makes the operator's work easier. The linear shape ensures quieter operation while improving hygiene. They also ensure a high degree of patient comfort due to their rounded shape and compact size, which reduces the gag reflex even in the most sensitive patients.

The EM40 tips are ideal for hard-to-reach areas due to their thin, extended end.

Available accessories

- EM40 aspirator tip adaptor autoclavable to 134°C. Can be used to adapt from a connection with a diameter of 1.6 cm to an outlet with a diameter of 1.1 cm.

Rubber dam

Medium-thickness latex rubber dental dam (0.18 mm/0.23 mm), optimized for better tear resistance. Thanks to the excellent antibacterial properties of latex, it optimizes infection control and cleanliness in the working area. Ideal for endodontic and conservative procedures, it isolates the affected area and limits aerosol formation.

Monoart Latex Dental Dam

Insulating

It creates an effective barrier between the area to be treated and the rest of the mouth, limiting contamination by bacteria in the oral cavity.

Effective

Soft and pliable, it facilitates the creation of a dry and stable intervention area, supporting work and improving visibility.

Functional

Used in conjunction with double surgical suction, it reduces aerosol formation, which is responsible for the transmission of viruses and bacteria.

Cotton rolls

Pure long-fibre cotton rolls with high absorbency (five times their weight). Monoart® cotton rolls are bacteriologically safe, having a bioburden level of less than 140 CFU/pc.

Available accessories

- Practical dispenser for cotton rolls, available in white and light blue.

Functional

Absorbent, durable and comfortable, they have excellent flexibility to adapt to the area in which they are placed maintaining the position and the shape when inserted.

Versatile

Available in 3 different sizes (0.8, 1 and 1.2 cm diameter) to suit the patient and different types of medical and surgical procedures.

Eco-friendly

Monoart® cotton rolls are bleached with hydrogen peroxide without the use of chlorine, paying special attention to the environment and sustainability.

Plastic cups

Disposable cups for dental treatments and mouth rinses, made of non-toxic polypropylene with rounded rim and 200 cc capacity. As a guarantee of quality and safety, each cup is marked with the embossed Euronda logo. Available in numerous colours and four original floral patterns to personalize your clinic.

Product assortment available

- Mix Monoart® 1000 plastic cups: contains 1000 cups in 6 different colours (200 lilac, 200 lime, 150 green, 150 light blue, 150 orange, 150 pink);
- Mix Monoart® 3000 plastic cups: contains 3000 cups in 6 different colours (500 cups per colour: blue, lilac, lime, orange, pink yellow).

Available accessories

- Practical plastic cup dispenser, wall-hanging, holds up to 70 coloured Monoart® cups (200 cc) and up to 80 white cups (166 cc).

Colours

Box with 30 packs

Ergonomics

Monoart® plastic cups have rounded edges and secure grip for maximum patient comfort.

Coloured

Available in twelve different colours and four original floral patterns. Add a touch of colour, design and liveliness to the dental practice.

Safe

Made of certified non-toxic polypropylene for guaranteed hygiene and safety.

Paper cups Foglie

Monoart® paper cups Foglie are made from cellulose from European forests managed according to strict environmental, social and economic standards. Foglie paper cups are produced in Europe to ensure sustainability and reduce CO₂ emissions. They are a good alternative to traditional plastic cups, guaranteeing the same characteristics and performance in terms of water resistance and safety.

Natura line

Much more than just a colour

Monoart® Natura line products have been developed by Euronova to reduce environmental impact, making use of coffee-processing waste that can be used to replace a proportion of the virgin cellulose fibres used to manufacture them.

To ensure sustainability and reduce CO₂ emissions, our paper cups are made in Europe, while Towel Up! towels and PG30 Natura aprons are made in Italy. All products in the Natura line are made without the use of glues and their packaging is fully recyclable.

Choosing the Natura line means sharing our production philosophy, focused on attention to processes, recycling and recovering waste, with respect for people and the environment.

Colours

Towel Up! and PG30:

Ecru with small organic residues that give texture.

Paper cups Foglie:

White with leaf pattern in shades of green and ecru

Paper cups Foglie

Cups made from cellulose sourced from forests managed in accordance with strict environmental, social and economic standards, that guarantee water-resistance and safety.

Towel Up! towels Natura

The paper used to make them contains up to 20% fewer virgin raw materials, through an upcycling process, without increasing consumption of water and energy.

PG30 aprons Natura

Made using the same upcycling process as Towel Up! Natura are obtained through the recycling of coffee production residues, reducing the consumption of virgin cellulose.

Floral line

Let the colour bloom in your clinic

Euronda Monoart® is synonymous with quality but also with style, having introduced colour into clinics around the world for the first time. To further enrich the already wide range of colours, the floral line was created: an original and fresh spring fantasy in four different colours (plus one for the masks).

The products available in the Floral line are polypropylene cups and four-ply floral face masks. Safety and protection combined with original Monoart® design.

Floral cups

Practical 200 cc disposable cups in non-toxic polypropylene, durable and reliable. Available in four vibrant floral colours.

Face masks Protection Floral

Four-ply protective masks with floral pattern, available in five colours. Soft rounded elastic and extended double-track nose bridge.

Face masks

Protection 3

Disposable medical face masks, ideal for preventing the transmission of micro-organisms by air. They guarantee excellent breathability (ΔP 25.4 Pa/cm²), which exceeds the requirements of EN 14683 ($\Delta P < 40$ Pa/cm²). Equipped with a particulate and antibacterial filter (99.7% filtration efficiency). Built-in nose bridge.

Face masks Protection 3 consist of three layers:

- soft and coloured water-repellent Spunbond non-woven fabric on the outside;
- Meltblown non-woven fabric middle layer;
- comfortable hydrophilic Spunbond non-woven fabric on the inside for effective absorption of sweat and moisture.

Available in two versions:

- with soft side elastics (all colours);
- with adjustable ties (light blue only).

Product mix available

- Mix Monoart® face masks Protection 3: contains 6 packs of masks (50 pcs), one per colour (blue, lilac, lime, orange, pink, yellow).

Protection 3

Safe

Medical Devices Class I, ideal for preventing the transmission of infectious agents by air, in accordance with EN 14683 and ASTM F2100.

Comfortable

Hydrophilic Spunbond non-woven fabric inner layer, available with soft rounded elastic or with adjustable ties and built-in nose bridge: absorption and comfort in one Medical Device.

Practical

The 'open/close' system makes it easy to use and hygienic.

Face masks Protection Floral

Floral patterned disposable medical face masks, fluid resistant (21.3 kPa), ideal for aerosol and splash protection. They prevent the transmission of micro-organisms by air and ensure excellent breathability (ΔP 39.2 Pa/cm²), which exceeds the requirements of EN 14683 ($\Delta P < 60$ Pa/cm²). Equipped with a particulate and antibacterial filter (99.7% filtration efficiency). Soft, rounded elastics and extended nose bridge with double track for greater stability and improved comfort.

Face masks Protection Floral consist of four layers:

- double layer of soft coloured water-repellent floral-patterned Spunbond non-woven fabric on the outside;
- Meltblown non-woven fabric middle layer;
- comfortable hydrophilic Spunbond non-woven fabric on the inside for effective absorption of sweat and moisture.

Extended double-track nose bridge for the perfect fit and grip to the wearer's face.

Breathability

The innovative four-layer system offers maximum lightness, breathability and protection, setting a new standard of quality for Monoart® face masks.

Safe

Fitted with a bacteria and particulate filter and a layer that protects the wearer from aerosols, moisture and splashes.

Face masks

Protection

Sensitive

Disposable medical face masks, fluid resistant (21.3 kPa), ideal for aerosol and splash protection. Prevent the transmission of micro-organisms by air and ensure excellent breathability (ΔP 38.6 Pa/cm²), which exceeds the requirements of EN 14683 ($\Delta P < 60$ Pa/cm²). Equipped with a particulate and antibacterial filter (99.7% filtration efficiency). Made from selected cellulose, they do not contain latex, glass fibre or chemical substances, and are thus able to protect the most sensitive skin and avoid the risk of irritations, dermatitis and allergies. Soft flat elastics welded onto the outside, extended nose bridge and Perfect Fit system.

Face masks Protection Sensitive consist of four layers:

- double layer of soft and coloured water-repellent Spunbond non-woven fabric on the outside for the best protection from microbial agents;
- middle layer made of Meltblown non-woven fabric;
- comfortable layer made of hydrophilic cellulose.

Classification

Medical Device Class I

Medical Devices Class I made from select materials to ensure maximum comfort and protection.

Face masks FFP2 NR Protection

Protection, comfort and the freedom to choose from six different colours. Monoart® face masks FFP2 NR Protection raise the bar in terms of protection with the touch of originality that has always characterized the Monoart® world. Manufacturing experience and Made in Italy quality are reflected in the care of every detail, from the tone-on-tone colour of the elastic bands to the embossed lettering, but also in the technical performance.

FFP2 NR Protection face masks are a category 3 PPE with a breathability index above the norm and a filtering capacity of over 99%, above the 94% standard specified by EN 149:2001+A1:2009. They provide adequate respiratory protection in environments where operators are exposed to dust and/or non-volatile liquid particles, mists and fumes.

Classification

Personal Protective Equipment Category 3, compliant with EU Regulation 2016/425

Colours

Black, blue, lilac, lime, orange, white

MONOART® FFP2 NR PROTECTION

Protective

Maximum filtering capacity thanks to the four protective layers: one inner and outer layer of Spunbond non-woven fabric and two inner layers of Meltblown fabric with outstanding filtering capacity (>99%).

Coloured

Available in six bright colours with tone-on-tone elastics for maximum protection without sacrificing style.

Comfortable

Soft, flat elastic bands welded to the outer part of the mask for maximum comfort and adherence to the user's face, all-Italian product quality.

Disposable latex gloves

Safe, comfortable, durable: Monoart® disposable latex gloves offer hygienic, comfortable protection for your hands. Easy to wear, thanks to their polymer inner lining and foldable cuff, they guarantee excellent tactile sensitivity and a firm grip in all conditions, thanks to their micro-roughened surface. The ideal way to approach any procedure with peace of mind. Monoart® latex gloves are available in four vibrant colours to express a unique style every day.

CE Ref

MONOART® Latex Gloves

Safe

Provide an exceptional protective barrier and contain no substances of concern (SVHC), endocrine disruptors or dust, which are often responsible for the respiratory symptoms caused by latex.

Certified

They meet strict quality control criteria and are certified according to EU Regulation 2016/425, in accordance with standards: EN ISO 374-1, EN ISO 374-4, EN ISO 374-5.

Resilient

Resistant to water, acids and alkalis, offering good protection against micro-organisms and most caustic substances and detergents.

Disposable nitrile gloves

Monoart® disposable nitrile gloves have been developed for people allergic to latex proteins. They provide an exceptional protective barrier against contamination and infection, ensuring outstanding mechanical and chemical resistance. They offer extraordinary mechanical and chemical resistance, making them suitable for all situations in which there is a risk of perforation, cuts or piercing, or when handling particularly aggressive chemicals. The quality materials also guarantee excellent tactile sensitivity, while the micro-rough texture ensures excellent grip in all conditions.

MONOART® Nitrile Gloves

High quality

Ideal for individuals allergic to latex proteins, they are manufactured from materials selected to guarantee the best characteristics and performance.

Protective

They are also very stretchy and ergonomic, only slightly less so than latex gloves. Indicated in all cases where there is a risk of perforation or exposure to chemicals and viruses.

Resilient

Nitrile gloves are Personal Protective Equipment Category 3 and provide greater mechanical and chemical resistance than ordinary latex and vinyl gloves.

Bandana

Cotton bandanas that are pleasant and comfortable to wear, equipped with ties and adaptable to all sizes. Thanks to the premium-quality cotton and resistant colours, they can be autoclaved at 121°C.

Product mix available

- Mix Monoart® bandana: contains 10 bandanas, one per colour (black, blue, light blue, light green, lilac, lime, orange, pink, white, yellow).

For every need

The Monoart® range of protective eyewear covers every need in the dental practice, guaranteeing high performance and specific eye protection for dentists, assistants and patients.

Comfortable

Protection and comfort in a single Personal Protective device. Monoart® glasses are designed to offer the best fit, adaptability to the face and stability.

Ergonomic

In the Monoart® range of eyewear you can find models that can be used over corrective spectacles or a version with orange lenses, with anti-fog and anti-scratch treatment and resistant to impact, UV400 (sunlight) and blue light (525 nm).

Protective glasses

Euronda Monoart® offers a wide range of protective glasses and visors for operators and patients, designed and manufactured to ensure maximum safety in every situation while guaranteeing comfort and an appealing design.

Treatment of protective eyewear

Anti-fog treatment

When used in combination with the surgical mask, lenses may fog up, impairing visibility. Monoart® protective glasses offer different types of treatment to prevent the formation of condensation:

- **Anti-fog Basic treatment:** meets requirement N of EN 166, preventing condensation formation for 8 seconds.
- **Anti-fog Plus treatment:** guarantees anti-fog properties five times higher than requirement N of EN 166, preventing the formation of condensation for 40 seconds.
- **Anti-fog Ultra treatment:** made on the inside of the lens, it prevents the formation of condensation over 40 seconds, guaranteeing outstanding anti-fog properties

Anti-scratch treatment

Scratches can compromise lens transparency and thus visibility, exposing the operator to various risks.

The lenses of Monoart® protective glasses offer different levels of protection against scratches and abrasions:

- **Anti-scratch Basic treatment:** meets requirement K of EN 166, which requires testing the scratch resistance by dropping quartz sand on the lens from a certain height and then testing the reduced luminance factor.
- **Anti-scratch Plus treatment:** hardens the lens surface for excellent scratch resistance and transparency in all conditions. The reduced luminance factor is 2 Cd / Mq x lux.
- **Anti-scratch Ultra treatment:** guarantees a longer lifespan, improved visibility even in critical conditions, and performs significantly better than standard anti-scratch treatments on the market. The reduced luminance factor is 1.2 Cd / Mq x lux.

Orange lenses

Many of the glasses in the Monoart® range are available in a double version:

- **With transparent lenses:** capable of filtering out the sun's rays (UV400).
- **With orange lenses:** for complete protection against UV400 (sunlight) and 525 nm (blue light), they improve contrast and increase visual acuity by reducing eye fatigue.

Frame technologies

Monoart® protective eyewear offers maximum comfort and ergonomics thanks to the innovative use of materials, attention to detail and careful design. You will find the following technologies in the Monoart® eyewear range:

- Adjustable nose pad;
- Integrated side protectors;
- Tilting movement of the temples for a perfect fit and stability;
- Adjustable tilt and length of the temples for a perfect fit.

Contemporary Glasses

Our Contemporary glasses offer the perfect combination of elegance, protection, comfort and style. Lightweight and very strong, Contemporary glasses are the perfect protective solution for doctors and assistants. The anti-fog treatment makes the lenses twice as effective against condensation, while the anti-scratch treatment is five times as resistant to abrasions. This is combined with a sophisticated and exclusive design, with a glossy total black frame, which allows the easy replacement of the standard lenses with corrective lenses if necessary.

Colours

Dental chair cover kit

Disposable chair cover made from soft, non-woven fabric (grammage 28 g/m²) for the protection and safety of patients. The chair cover kit consists of a headrest cover, backrest cover and seat cover. With its all-purpose size, it is suited to all kinds of dental chairs thanks to the elasticated edges and ties that make it totally adaptable.

Colours

Blue, green, light blue, lilac, lime, orange, white, yellow

Packaging

Pack of 1 kit consisting of 3 pieces
Box of 25 single-colour packs

Universal

Includes headrest cover, backrest cover and seat cover. Adaptable to all dental chair models thanks to the elastic edges and ties.

Comfortable

Made of soft, hypo-allergenic and breathable polypropylene non-woven fabric.

Hygienic

Protects the dental unit on a daily basis for patient safety.

Headrest cover

Headrest cover made of cellulose on the outside and polyethylene on the inside. Complete with practical dispenser with 'open/close' system.

Colours

Blue, green, white

Size

28 x 30 cm

Packaging

Pack of 250 pieces
Box with 8 packs

Resilient

Maximum resistance and impermeability to protect the most sensitive area of the dental unit.

Universal

Its size and pouch design make it usable on various dental chair models for simple and immediate application.

Functional

The practical dispenser protects the product while ensuring hygiene and patient safety.

Tray Paper

Steam- and gas-permeable crepe paper, free of chlorine, dioxin and ash. Developed by Euronda research to support the operation and sterilization process, its paper does not degrade or crumble on contact with steam, making it the ideal liner for the tray.

Product assortment available

- Mix Monoart® Tray Paper: contains 6 packs of Tray Paper (light blue, lilac, lime, orange, pink, yellow).

Colours

Green, light blue, lilac, lime, orange, pink, white, yellow

Size

28 x 18 cm

Packaging

Pack of 250 pieces
Box with 10 packs

Practical

Tear-resistant, highly absorbent crepe paper sheets. The ideal liner for the bottom of the tray.

Resilient

Steam- and gas-permeable and resistant to moisture, they do not fray or degrade during sterilization, avoiding residues that could clog the autoclave drain.

Safe

Free of chlorine, dioxin and ash, they minimize water condensation.

Decontamination mat

Monoart® decontamination mat in low-density polythene with 30 numbered and branded adhesive sheets, to prevent the spread of bacteria in the surgery. Thanks to the special formula of the bactericidal gelatine present on the upper surface, it removes and deactivates the bacteria present on the soles of shoes. Product made in Italy.

Eurosteril® sterilization rolls

Eurosteril® sterilization rolls are produced in Italy with the best certified materials: high grammage medical paper (60 g/m²) and a double layer of polyethylene/polypropylene film, in compliance with MDR (EU) 2017/745 and EN 868-5. State-of-the-art processes ensure: a constant seal during sterilization; extreme ease of opening without fibre release or tearing; proper maintenance of sterility. Coloured chemical indicators signal at a glance that sterilization has taken place.

Available in two versions:

- flat, available in different sizes;
- gusseted, ideal for packing large objects and instruments. Available in different formats.

Product mix available

- Mix Eurosteril®: contains 2 rolls of 5 cm, 2 rolls of 7.5 cm, 1 roll of 10 cm.

Classification

Medical Device Class I

Packaging

Flat rolls

5 cm x 200 m (8 pieces)
7.5 cm x 200 m (5 pieces)
10 cm x 200 m (4 pieces)
15 cm x 200 m (2 pieces)
20 cm x 200 m (2 pieces)
25 cm x 200 m (1 piece)
30 cm x 200 m (1 piece)
40 cm x 200 m (1 piece)

Gusseted rolls

20 cm x 5 x 100 m (2 pieces)
25 cm x 5 x 100 m (1 piece)
25 cm x 6.5 x 100 m (1 piece)

CE Ref

EUROSTERIL® ROTOLI
PER STERILIZZAZIONE,
STERILIZATION ROLLS,
STERILISATIONS ROLLEN

Durable

Six months sterility from the date of production in ideal storage conditions and subject to validation of the sterilization and sealing process.

Safe

Excellent peelability during opening, with no release of paper fibres or tearing of the plastic material.

Versatile

Available in two versions - flat and gusseted - and eight sizes, to best meet all packaging requirements.

Eurosteril® sterilization pouches

Heat-sealable pouches made of white medical paper with high grammage (60g/m²) and double layer of blue polyethylene/polypropylene film, in compliance with MDR (EU) 2017/745 and EN 868-5. Three uniform, waterproof side channel seals for maximum microbial protection. Equipped with chemical indicators for steam or EO gas (ethylene oxide) sterilization. Optimum peelability without the release of paper fibres or tears to the film when opening the packaging. Product made in Italy.

They are available in two versions:

- classic heat-sealable;
- self-adhesive, equipped with a synthetic rubber adhesive band and closing fold. Practical and easy to use, they provide immediate protection without the use of heat sealers.

Durable

They maintain sterility for up to six months from the date of manufacture in suitable storage conditions and subject to validation of the sterilization and sealing process.

User-friendly

Consisting of a 60 g/m² medical paper side and a polyethylene/polypropylene laminate film layer, they comply with MDR (EU) 2017/745 and EN 868-5.

Functional

They provide an excellent antimicrobial barrier and, thanks to chemical colour indicators, they change colour, signalling at a glance that sterilization has taken place.
