atena

space · colour · organization

the universal
sterilization

Atena is the specific line for sterilization rooms that complements Rossicaws cabinet lines. Atena is based on modular systems to make any professional's **workflow much more fluid**. No matter the size of your workspace: Atena can fit into a wide range of sterilization rooms, from compact solutions for small ones to customized versions. We all know hygiene is the top priority and that's why this new line is entirely made of metal, with stainless steel handles to complete. Atena is definitely **made to last.**

From now on the strictest protocols will be easier to comply with thanks to the new colour codes that enhance task and space organization.

(modules/wall cabinets)

atena **mini**

Atena has been designed to fit into the tightest rooms and create the best working environment. The essential is there, where it is supposed to be.

3. AT72 60cm

Infected materials collection modules. Cleaning and disinfection module with autoclave and thermosealing machines column. Wall cabinet for sterile instruments storage.

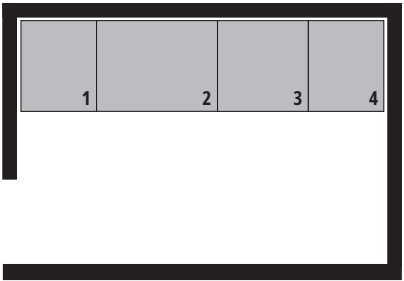

Infected materials collection module. Cleaning and disinfection modules with mobile unit for autoclaves. Module and two-door wall cabinet for sterile instruments storage.

atena **regular**

Cleaning and disinfection area gains a wider space thanks to the 80cm module with drawers and internal dividers, together with the mobile unit for autoclaves. The storage area increases as well, both inside the 80cm module and the wall cabinets.

6. AT01 50cm

atena **large**

Moving between any operational area has never been so effective. Friday comes first, to collect infected materials from every cabinet. We move then to the sink installed in the worktop, to clean infected instruments and equipments. Last but not least, we place sterile instruments and equipments in the storage modules and wall cabinets.

Stainless steel hopper 20 x 10cm with lid (ACS26)

Stainless steel holder for trays with 6 adjustable supports (ACS73) W23,5 x H28 x D22,5cm

Infected materials collection module. Cleaning and disinfection modules with thermal disinfector unit, and autoclave and thermosealing machine column. Storage modules.

atena full

The most equipped version of the Atena line. Accessories and equipments find their place in the splashback panel, including special waste bin and ultrasonic cleaner.
Autoclave and thermosealing machine column sets the border between dirty and clean areas, and guarantees easy access to both thanks to its lower position.
